FIELD GUIDE / SCHEMA 2.0.0

What you actually bought

A production-ready data foundation

ONE CATALOG. SIX CONNECTED WORKFLOWS.

Use stable item IDs across loot, shops, crafting, quests, rewards, and complete regional content.

500

VALIDATED ITEM RECORDS

50

PROGRESSION FAMILIES

10

CANONICAL BIOMES

10

ITEM CATEGORIES

01

Creator-ready content

Original names, descriptions, hooks, trade uses, quest uses, visual identity, drawbacks, salvage, and economy fields.

02

Developer-ready data

JSON, CSV, documented schema, version manifest, stable IDs, migration map, and loaders for four common runtimes.

03

Offline workflow tools

Search and export the catalog, then generate deterministic collections without an account, install, API, or subscription.

Three-minute launch path

No installation or account required

01 Open START-HERE.html

The package launchpad links every primary tool and document from one branded screen.

02 Inspect the catalog

Open item-explorer.html. Search by name or filter by category, rarity, biome, tone, tier, object type, and state.

03 Build a collection

Open item-collection-builder.html. Choose a biome, use case, maximum tier, item count, and a reusable seed.

04 Integrate the records

Use items.json or items.csv directly, validate against schema.json, or start from the included engine loaders.

BEST FIRST TEST

Build a six-item coastal loot cache with seed saltglass-cache-17, then export the result as JSON.

Anatomy of a catalog record

Example: pitm-0001

Brineworn Amulet

WEARABLE | TIER 1 | COASTAL | COMMON

```
{
  "id": "pitm-0001",
  "family_id": "itm-fam-001",
  "name": "Brineworn Amulet",
  "category": "wearable",
  "tier": 1,
  "biome": "coastal",
  "state": "finished",
  "suggested_value": 37,
  "weight": 0.5
}
```

Identity

Stable item and family IDs preserve references across every World Foundry module.

Use at the table

Function, mechanical hook, trade use, and quest use give each record multiple gameplay jobs.

Implementation

Category, object type, state, materials, tags, values, stack limits, and weight support filtering and systems.

Editorial texture

Visual identity, drawback, tone, faction affinity, and salvage outputs prevent generic placeholder entries.

Inspectable value curves

Deterministic, editable, and system-neutral

Suggested values are transparent content fields, not rules for a branded game system. Treat them as a consistent baseline for relative scarcity, progression, reward planning, and shop inventory composition.

Base value

A consistent starting point before rarity and scarcity are applied.

Scarcity multiplier

An inspectable factor that explains the suggested value rather than hiding it.

Your economy

Remap or rescale any value field without breaking stable references.

Fifty coherent item families

Two records per tier in every family

Families support progression without replacing every record with unrelated higher-tier content.

TIER 1	Brineworn Amulet	common	finished	VALUE 37
TIER 1	Rimebound Amulet	common	finished	VALUE 38
TIER 2	Mossbound Amulet	uncommon	finished	VALUE 47
TIER 2	Vaultmarked Amulet	uncommon	finished	VALUE 48
TIER 3	Cairnforged Amulet	rare	finished	VALUE 64
TIER 3	Brassline Amulet	rare	finished	VALUE 65
TIER 4	Miresealed Amulet	rare	finished	VALUE 82
TIER 4	Riverworn Amulet	rare	finished	VALUE 84
TIER 5	Sunscorched Amulet	epic	finished	VALUE 113
TIER 5	Deepdelve Amulet	epic	finished	VALUE 115

FAMILY KEY: itm-fam-001 | STABLE ITEM REFERENCES: 10

Six ways to use the same records

Coherence comes from reuse, not repetition

01 Loot

Filter by biome and tier, then use suggested value and rarity to shape reward curves.

02 Shops

Stock merchants with region-fit records while retaining stable references for pricing and restock.

03 Crafting

Use materials, crafting roles, disciplines, states, and salvage to build recipe graphs.

04 Quests

Turn quest use, faction affinity, drawbacks, and trade use into concrete objectives and evidence.

05 Encounters

Attach table descriptions and physical complications to rewards found at a location.

06 Regions

Reuse item IDs across local shops, routes, factions, encounters, and campaign hooks.

Four included loader paths

Start from code you can inspect

UNITY

`UnityItemDatabase.cs`

Deserialize the JSON catalog into typed serializable records and build an ID lookup.

GODOT 4

`GodotItemDatabase.gd`

Load JSON, index items by stable ID, and expose filtered collections to scenes or tools.

TYPESCRIPT

`items.ts`

Use the included interfaces and loader for typed editor, tool, or game-code workflows.

JAVASCRIPT

`JavaScriptItemLoader.js`

Load, index, search, and filter records in browser or Node.js projects.

Coastal + Desert

Fifty records per biome

COASTAL

50 records | 10 categories | 5 tiers

Brineworn Amulet wearable common pitm-0001	T1
Brineworn Anvil crafting uncommon pitm-0002	T2
Brineworn Band wearable rare pitm-0003	T3
Brineworn Bell trinket rare pitm-0004	T4
Brineworn Blade weapon epic pitm-0005	T5

DESERT

50 records | 10 categories | 5 tiers

Sunscorched Anvil crafting common pitm-0202	T1
Sunscorched Band wearable uncommon pitm-0203	T2
Sunscorched Bell trinket rare pitm-0204	T3
Sunscorched Blade weapon rare pitm-0205	T4
Sunscorched Amulet wearable epic pitm-0201	T5

Forest + Highland

Fifty records per biome

FOREST

50 records | 10 categories | 5 tiers

Mossbound Blade weapon common pitm-0055	T1
Mossbound Amulet wearable uncommon pitm-0051	T2
Mossbound Anvil crafting rare pitm-0052	T3
Mossbound Band wearable rare pitm-0053	T4
Mossbound Bell trinket epic pitm-0054	T5

HIGHLAND

50 records | 10 categories | 5 tiers

Cairnforged Bell trinket common pitm-0104	T1
Cairnforged Blade weapon uncommon pitm-0105	T2
Cairnforged Amulet wearable rare pitm-0101	T3
Cairnforged Anvil crafting rare pitm-0102	T4
Cairnforged Band wearable epic pitm-0103	T5

Marsh + River

Fifty records per biome

MARSH

50 records | 10 categories | 5 tiers

Miresealed Band wearable common pitm-0153	T1
Miresealed Bell trinket uncommon pitm-0154	T2
Miresealed Blade weapon rare pitm-0155	T3
Miresealed Amulet wearable rare pitm-0151	T4
Miresealed Anvil crafting epic pitm-0152	T5

RIVER

50 records | 10 categories | 5 tiers

Riverworn Band wearable common pitm-0403	T1
Riverworn Bell trinket uncommon pitm-0404	T2
Riverworn Blade weapon rare pitm-0405	T3
Riverworn Amulet wearable rare pitm-0401	T4
Riverworn Anvil crafting epic pitm-0402	T5

Ruins + Tundra

Fifty records per biome

RUINS

50 records | 10 categories | 5 tiers

Vaultmarked Blade weapon common pitm-0305	T1
Vaultmarked Amulet wearable uncommon pitm-0301	T2
Vaultmarked Anvil crafting rare pitm-0302	T3
Vaultmarked Band wearable rare pitm-0303	T4
Vaultmarked Bell trinket epic pitm-0304	T5

TUNDRA

50 records | 10 categories | 5 tiers

Rimebound Amulet wearable common pitm-0251	T1
Rimebound Anvil crafting uncommon pitm-0252	T2
Rimebound Band wearable rare pitm-0253	T3
Rimebound Bell trinket rare pitm-0254	T4
Rimebound Blade weapon epic pitm-0255	T5

Underground + Urban

Fifty records per biome

UNDERGROUND

50 records | 10 categories | 5 tiers

Deepdelve Anvil crafting common pitm-0452	T1
Deepdelve Band wearable uncommon pitm-0453	T2
Deepdelve Bell trinket rare pitm-0454	T3
Deepdelve Blade weapon rare pitm-0455	T4
Deepdelve Amulet wearable epic pitm-0451	T5

URBAN

50 records | 10 categories | 5 tiers

Brassline Bell trinket common pitm-0354	T1
Brassline Blade weapon uncommon pitm-0355	T2
Brassline Amulet wearable rare pitm-0351	T3
Brassline Anvil crafting rare pitm-0352	T4
Brassline Band wearable epic pitm-0353	T5

Category and state matrix

Balanced records, not a single-content list

	COMPONENT	CONSUMABLE	FINISHED	KEY-ITEM	RAW	REFINED
CONSUMABLE	0	40	0	0	0	0
CRAFTING	10	0	20	0	0	20
MATERIAL	0	0	0	0	40	0
QUEST	0	0	0	20	0	0
RELIC	0	0	50	0	0	0
TOOL	0	0	90	0	0	0
TRADE	0	0	30	0	0	0
TRINKET	0	0	50	0	0	0
WEAPON	0	0	30	0	0	0
WEARABLE	0	0	100	0	0	0

Every category, biome, and tier is represented. State distribution follows object semantics rather than forced symmetry.

Everything in the download

Open START-HERE.html first

START-HERE.html	Branded package launchpad
item-explorer.html	Offline catalog browser and filtered export
item-collection-builder.html	Seeded collection generator
items.json / items.csv	Complete catalog in two standard formats
schema.json	Machine-readable record contract
schema-version.json	Version and compatibility declaration
migration-v1-to-v2.json	Stable-ID migration map in the paid edition
integrations/	Unity, Godot 4, TypeScript, and JavaScript loaders
QUICKSTART.md / examples.md	Implementation notes and sample workflows
USAGE-TERMS.md	Commercial-use license terms

Build with it. Do not resell the source pack.

Plain-language summary; complete terms control

THE PRACTICAL BOUNDARY

YES**YOU MAY**

Use and modify the original content in personal or commercial games, apps, tabletop projects, videos, and client work. Attribution is not required.

NO**YOU MAY NOT**

Resell or redistribute the source pack, substantially similar source data, or a lightly modified competing catalog as a standalone product.

SYSTEM-NEUTRAL ORIGINAL CONTENT

No copyrighted characters, branded settings, protected game text, or franchise assets are included. Review USAGE-TERMS.md in the package for the complete license wording before distribution.
